FACE SHIELD INSTRUCTIONS

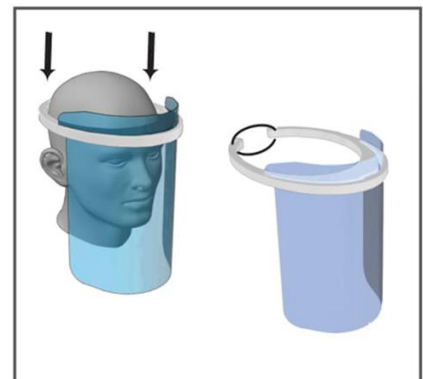

In response to the public outcry for Personal Protective Equipment (PPE), ProTect has re-tooled our manufacturing capabilities to produce washable/reusable: face shields, face masks and gowns. In addition, we offer a full line of protective barriers and walls for constructing temporary and rooms. Leveraging ProTect's can-do attitude, engineering, fabrication and graphic production capabilities provide customers with high quality PPE items.

Remove the protective film from the PETG / Polycarbonate shield. Bend the shield and slide it into the top curved slot of the headgear.

Slide the shield down until the hole locks into place.

Place headgear over the crown of your head. Position to a comfortable fit. To tighten; secure the back ends with a rubber band, hair tie or zip tie.
